A note about math practice at home

Dear parents and carers,

This term our class is practising ..... (e.g. adding and subtracting within 20). A few minutes at home makes a real difference: number facts stick when they come back little and often.

Here are three free ways to help:

1. **Print a worksheet.** At genidino.com/en/math-worksheets you can make worksheets for addition, subtraction, times tables, division and missing numbers, with the answers on a second page. One sheet three or four times a week is plenty.

2. **Try the times tables test.** A short online quiz at genidino.com/en/times-tables-test shows which facts your child already knows and which ones to practise.

3. **Talk about numbers.** Count the stairs, share snacks fairly, add up the shopping. Ask “How did you work it out?” and praise the effort, not the speed.

The worksheets are free, with no sign-up and no ads, and nothing about your child is collected.

If your child enjoys games, Genidino Arena and Genidino Kingdom turn the same practice into a game. They are free to try, the full game is a single purchase, and there are no ads. They are optional: the worksheets are all you need.

Thank you for your support. If you have any questions, please get in touch.

Kind regards,
